The World Exonumia - AAA Historical American Mail Bid sale #11 of 7 November 2006 featured the important Jefferson silver shell Indian Peace medal, which realized \$54,075. The silver oval IP medals brought around \$6200 to \$6510 each.

The Greg Brunk collection of counterstamped coins brought record prices, with many items selling for substantially over estimate. The unique Stone & Ball on a \$2.50 gold coin brought \$4387 in active bidding. The rare Louisiana Civil War Siege Token of Schiller, soon to be listed as a Civil War token, brought \$2521. A unique silver Hard Times token c/m of Henshaw and Bennett brought \$2250. An Early American die cutter c/m of James Chinnery realized \$2115. The "Wagner" c/m on an 1799 Heraldic Eagle dollar realized \$2750.

A unique copper nickel Civil War token of Madison WI, originally sold in the 1999 sale of the Hartzog WI CWT collection, brought \$2215. The three Slave Tags brought \$2490, \$3245 and \$2545 in active bidding. In general, the scarce to rare items did quite well, with many items bringing well over estimate. The more common items did not fare as well, with many bringing only a fraction of estimate.

The entire sale of almost 2800 lots was estimated at \$264,405, and realized \$238,912, with bid reductions of over \$44,000. Hartzog reduces bids to one increment over the second-high bidder, allowing bidders to bid their maximum amount. Only 4% of the lots were unsold. No buyers fee is charged. Unsold items and items selling for under \$10 are not listed in the prices realized.

Bids will be accepted past the closing time until a half hour passes without any calls. Please call **EARLY!** Bids must be **RECEIVED** by the closing date. The **opening bid** will only be available to previous bidders, beginning 27 October. The opening bid is the minimum increment over the second highest bid. The opening bid is **ONLY** available to bidders who have already bid on that lot, at least 50% of low estimate or at least 50% of the opening bid for lots without estimates. To avoid numerous closing night call-backs, which we feel are unfair to underbidders, only the opening bids as of Noon the closing days will be available and subsequent bids will not be revealed. Due to "limit-bids", "group-bids" and "one-lot-only" bids, the opening bid may not be fully accurate prior to the auction close. Bidders are encouraged to submit their maximum bids and trust in our computerized bid reductions.

**Special Note:** You may bid ANY amount, but once you have gotten the opening bid, no bids below that amount are accepted. We regret we are unable to cancel any bids after 5 November

## SPECIAL INTERACTIVE Bidding

IF you have submitted your bids prior to the closing date we will e-mail or fax to you a list of your bids with the current information, opening bids, etc., on days previous to the closing. The opening bid will only be revealed if you have bid at least 50% of it. Obviously you need to specify your e-mail address or fax number on the bid sheet.

**ALL FAXES will be acknowledged:** Due to occasional problems, please include your phone and fax numbers on all faxes and resubmit if you do not get an acknowledgment within 24 hours (even if after the closing date). We are not responsible for incomplete or unreadable faxes.

5. All items in this sale are **UNCONDITIONALLY GUARANTEED** to be authentic and genuine. There is **NO** time limit on this guarantee. Should any item prove to be a copy, replica, fantasy or counterfeit, it may be returned at ANY time for a full refund. In addition, we will pay for any reasonable authentication service charge in the event any item is shown not to be original, plus your postage. Lots sold "AS IS" are not returnable, nor are any items described as a replica, counterfeit or fantasy. This guarantee does not extend to attributions, which may change, or to any item already authenticated by NCS/NGC.

6. **GRADING** is an art, not a science. We have attempted to conservatively grade each item. The amount of grade description is proportional to the value. Please do not expect every minor flaw to be described on a Fine-condition \$10 token. Persons interested in subtle variations of grade should inspect the lots or call/write for additional information or a **FREE** picture (see below). Tokens and Medals are **NOT** coins, graded on a Mint-State scale. A "Choice Unc." token may, and probably will, have minor spots, micro-hairlines, rub or wear on high spots and other minor problems visible with a glass. Exonumia is **RARE** in high grades. Sorry, no returns are generally allowed on the basis of minor grade opinion differences.

7. No Tie Bids; the earliest postmark gets the lot. Please bid in odd amounts: \$10.28 vs. \$10.00.

8. The **Minimum Bid** on every lot is \$4.00. All bids are in U.S. Funds. Bids under \$4.00 are ignored.

9. We reserve the right to withdraw lots and reject unrealistic bids (although we seldom do so!). In a very few cases we have duplicates of a lot. We reserve the right to sell a duplicate in the same grade as the lot description to the underbidder. Photographs are generally the item being sold.

10. **ALL BIDS REDUCED:** All lots will be sold to the highest bidder at a modest advance over the second high bid. Our computerized system automatically reduces your bid whenever possible, saving you money and allowing you to bid your maximum bid. Bid with confidence, as hundreds of bidders have done. By reducing your bids, we offer you the convenience of allowing you to bid your top limit, knowing we will reduce your bids as much as possible. Bids under \$25.00 will not be reduced, nor will bids be reduced to under \$25.00. All bids over \$25 ARE reduced to 10% over the second high bid. Bids over \$5,000 are reduced to 5% over the second high bid. No maximum bids are reduced over 40%, and bids are not reduced below 90% of the low estimate. **We REDUCE your Bids!**

11. The **GUIDE PRICE or Estimate** is to be used as a **GUIDE ONLY**. These estimates are based on my research and knowledge and are the estimated market prices only. Please feel free to bid higher or lower. Your bids **WILL** be reduced! Aside from the general minimum bid of \$4 per lot, there is **NO** minimum bid per lot and **ALL** bids at any level are welcomed. If you feel my estimates are too high, please bid at half, a quarter or less! You cannot insult me and **ALL** bids are solicited. **PLEASE** bid what the item is worth to you, a fraction of estimate or a multiple. Every sale has items selling for 10% of estimate or less. All the lots in this sale are for sale to the highest bidder, regardless of the estimates. If you don't bid, you won't get anything! Lots without estimates are generally estimated to bring under \$25.

## SPECIAL SERVICES

12. **PERCENTAGE INCREASE:** Bidders may use the "Increase Boxes" on the Bidding Form to increase their bids by ANY percentage. This is a useful technique for advancing your mail bids as if you were bidding on the floor in competition with other bidders. This will only be used if necessary. This applies to bids over \$25.00 only. If you do not have a bid form, please carefully specify the increase percentage for **ALL** or selected lots. You can have a different percentage for each lot, if you wish to do so.

13. **LIMIT BIDS:** Bidders may limit purchases by specifying the maximum amount they wish to spend. Please list your lots and bids in the order of preference. Your bids will be executed in that order until your purchase limit is reached. Please **DO NOT** bid up to only your dollar limit, as you most likely will **NOT** get every lot you bid on! Please feel free to bid up to **TEN** times your limit, or more.

14. **GROUP BIDS:** You may place one bid on any sequential number of lots, provided you also bid on each lot. Your individual bids are ignored when figuring the group bid, but the group bid must exceed the total bids of the individual lots by the minimum increment.

15. **ONE LOT ONLY Bids:** You may bid any amount on several lots, and specify only one lot. Please mark your bid sheet carefully. You can combine these options.

16. All lots are shipped upon receipt of full payment. We regret we are unable to make any exceptions, even to our best customers. This insures we are able to pay our consignors in full and on time. All invoices are payable within **FIVE** days after receipt. Past due accounts are subject to a service charge of 1.5% per month.

17. All lots will normally be sent by U.S. Mail, with all items over \$20 sent via insured or registered mail. Postage, insurance and packaging will be added to all lots.

18. Auction sales **ARE NOT** approval sales! All returned lots must be made within five days of receipt. Your errors are your responsibility and ours are ours. The only legitimate reason for returning a lot is if it has not been correctly attributed. Any return must be insured for the full value and the reason for the return given. I do pay postage both ways for my mistakes (see #1). There is **NO RETURN** of bulk lots of 5 or more items, which are sold **AS IS**.

19. **FREE MATCHES** to your 'want list'. Send your specific interests for a custom web page or listing of all items in this sale matching your 'wants'. Almost all items are pictured obverse and reverse in full color on the internet.

20. Time payments are available. Send an advance deposit of 20% of your total limit and we will arrange reasonable payments for the balance due.

21. The **Prices Realized** are published, at \$5.00. The top bid before reduction, the purchaser or other bidders are confidential and are not revealed.

22. Most photographs are at 100% of the original, with a few at reduced size. Sizes are usually in millimeters. All photos have been digitally enhanced to better show details.

23. All bidders must supply full mailing address and home phone number (we are unable to accept bids from e-mail addresses alone!). Bidders with Post Office boxes are asked to supply confidential street addresses. References are desirable for new bidders. Previously unknown internet bidders may be asked for confirmation of bids by mail.

24. The auctioneer specifically reserves the right to refuse bids from anyone and to bid for his own account on any items.

## Coins: Ancients, Copies

108. **Ancient Roman Sestertius made into a Medieval Christian Seal or Die for Making Baked Clay Tokens!** This began as an ancient coin, a sestertius of the Emperor Antoninus Pius (138-161 AD). Much later the piece was engraved intaglio on the reverse with a Christian cross in the shape of a sword, surrounded by rays and a circle. In an outer circle are medieval Gothic letters that are too patined to read. This could have been used as a stamp to mark a monastery's goods, or it might have been used to make pottery tokens by impressing clay, and then firing the clay in a kiln. (Tokens of this sort occasionally are found in archaeological excavations, but are rare). The original sestertius of Antoninus Pius is well worn, but his laureate bust is clearly identifiable, as are the letters "AVG" for the title Augustus that appear to the left of the bust. 30 mm, brass, patined black, with areas of yellow. UNIQUE! We could find nothing remotely like this in any auction catalog or reference book! Engraving worn, VG, with sediment in recessed areas. . . . . \$500.00-2000.00+
109. **Roman Dupondius Copy of Augustus Made for Use as Gaming Piece, 1903.** High quality, struck copy of a dupondius of Augustus (27 BC - 14 AD). "Avgstvs XIX BC" around radiate bust of emperor / "S C" around temple, over "Provident" This had us stumped with its date of 19 BC until we found a 1969 "Numismatist" article that illustrated it on page 303. It is a game piece used in the board "Game of the Caesars" produced in 1903 by C. B. Arnold. 30 mm, copper. XF. . . . . \$35.00-50.00+

110. **Copy of Engraved Ancient Gem Stone.** Oval copy of engraved ancient gem stone by Pamphilos. Bust of Diana, the goddess of hunting, holding bow and quiver, crescent above head. See Forrer 4: 371. Seems to be struck from a 19th century die made from a high quality cast of a museum specimen. The artist's signature appears in small Greek letters to the right of the bust of the goddess. 30 x 26 mm, uniface, two pinholes for mounting made in the blank, outer margin of excess edge metal. XF-AU. . . . . \$60.00-75.00+
111. **29 Becker Copies Ancient Roman Republican Denarii.** Copies of Roman Republican denarii made by Becker, Inc. in the 1960s from casts of museum specimens. Many are in envelopes with with detailed descriptions and attributions to Sydenham, Babylon, and other catalog numbers in the handwriting of Harold Roepe, founder of the Ancient Coin Club of America. (Brunk cataloged ancient coins for their auctions in the 1960s, and bought these copies from Roepe before he retired). Lot of 29, about XF. . . \$150.00-300.00+
112. **Copies of Ancient Greek Staters.** Three copies of Greek staters made by Becker, Inc. in the 1960s from casts of museum specimens. Amphipolis, Rhodes, and Persian Satrap Mausollis of Caria. High relief in an alloy imitating silver. About XF. . . . . \$30.00-40.00+

Female head surrounded by dolphins "Syracuse" in Greek / Horse's head, Aramaic inscription. 2) Perhaps earlier copper 27 mm of Byzantium with type of Pegasus and legend / Dolphin over seashell. About XF. . . . . \$25.00-30.00+
115. **11 Copies of Biblical Coins.** Eleven copies from various sources probably pre-1975. Two denarii of Tiberius (the "Tribute Penny"), two tetradrachms of Tyre, and the rest are copies of Jewish Widow's mites and shekels. About F/XF. . . . . \$30.00-50.00+

Has trident symbol in field of the sort used by some Indian native states as a mintmark. Purpose? 18 mm, brass. F-VF. . . . \$15.00-20.00+

# The Gregory Brunk Collection of Countermarked Coins

Dr. Brunk is a well known author of books and articles on countermarked coins, including his recent important book on merchant countermarked coins (see lot #413). This is the third and final offering of his collection of important merchant and other countermarked coins. Many of these historical pieces have never appeared at auction. Obviously this is a rare opportunity to acquire specimens for your collection. In addition, many are plate specimens from his three books on countermarks. Every lot is pictured in color and available for your viewing on our web site [www.exonumia.com](http://www.exonumia.com).

## Estimates and Bidding

As many pieces are so rare, it is quite difficult to provide accurate estimates. We believe the estimates are conservative, and we recommend you bid your maximum amount, and allow our computerized bidding system to reduce your bids to one increment over the second high bid. This NOT an internet live-bidding system where instant updates are available, so please do not wait until the last day to send in your bids.

## Ancient and Medieval

- 124. Roman Coin of Augustus (37 BC-15 AD) Countermarked by the Kings of Edessa in Mesopotamia, ca. 30 .** Christopher Howgego first identified this type of c/m, which is found on only a handful of ancient Roman coins, in 'Greek Imperial Countermarks' (RNS 1985). The very rare series is written in Old Edessan, and this stamp appears to be "Manou" for "King". The coin was minted by Augustus (27 BC - 14 AD) in Antioch, Syria. Emperor's Bust / "SC" in wreath. 22 mm bronze. G-VF, much of design obliterated by the countermark, which is a large 8 mm square "Manou" (see Howgego 153 and 695). VERY RARE, and this is the only example that has appeared at auction. Countermark VF, but weak to the left where the stamp may have begun to break up. . . . . \$150.00-250.00+
- 125. "CAES" Countermarked Moneyer As of Roman Emperor Augustus.** As of Augustus issued in 7 BC by the Moneyer Maecilius Tullus. Countermarked "CAES" for "Caesar" by a Roman legion on the German frontier. . . . . \$30.00-35.00+
- 126. Emperor Augustus German Frontier Countermark.** Orichalcum Dupondius of the Emperor Augustus (27BC-14AD), countermarked "AVG" in a Roman Legion camp on the German frontier, probably in what is now Switzerland. 'Avgvstvs/Tribvnicv/Potest' in laurel wreath, reverse 'Cn Piso Cn F III Vir Aaaff' around large SC, BN-473, C-378, RIC-71. About VF. . . . . \$125.00-150.00+
- 127. Countermarked Roman Bronze Coin, ca. 50AD.** Countermarked Roman As. This is a "lime coin" (a thin cast copy made on the German frontier), which is so worn that its design cannot be distinguished. It has two countermarks: 1. AVG for "Augustus" 2. TIC A for "Tiberius Caesar Augustus." The latter countermark of Claudius (41-54 AD) is quite unusual. It is only known on coins of Caligula (37-41) with Seated Vesta reverse (Sear-516), and was the subject of a 1980 article by Rodolfo Martini in Rivista Italiana di Numismatica. The purpose of the countermarks, which were applied at a Roman legion fort somewhere on the German frontier, was to authorize the continued circulation of such worn and light weight coins. Black patina, countermarks weak but legible. AG. . . . . \$40.00-50.00+
- 128. Ancient Rome. Sestertius of Domitian, 81-9, 81-9.** Sestertius of Domitian (81-96 AD). Titles around laureate bust / "S C" and Minerva advancing, holding spear and shield. Seaby-806. VG-F, with corrosion spot on reverse, but nice, Fine portrait. . . . . \$100.00-125.00+
- 129. Ancient Rome. Silver Denarius of Trajan for Conquest of Romania.** Denarius of Trajan (98-117 AD). Titles around laureate bust of emperor / "SPQR Optimo Principi" around weeping Dacia, seated at foot of military trophy. This commemorates the conquest of Romania (ancient Dacia). RIC-220. 17 mm, silver, trace of vertigris. F/VF, some light green. . . . . \$50.00-75.00+

- 130. 20 Ancient Roman Limesfaschen Unusual Lot .** "Limesfaschen" are ancient counterfeits of Roman bronze coins which were made on the German frontier. Often found in excavations of legion forts, but rarely seen on the numismatic market. These are about a third the weight of the original coins, and all have countermarks, both very worn. They were countermarked to validate worn coins for extended circulation, often with the countermarks virtually worn off. The marks were applied in legion forts and some can be identified. A couple have a very weak "AVG" for 'Augustus'. Another has a previously unknown shield countermark, with others have large marks previously unknown to Brunk. A number have "TI CA" for 'Tiberius Caesar Augustus' (or the misspelled version "IT CA"). Until this group was discovered, that mark was quite unusual and rare, and had only been known on coins of Caligula (37-54 AD) with the Seated Vesta reverse (Sear-516). Most are so worn that nothing can be seen of the designs, although "SC" is visible on the reverse of one, and two seem to have the bust of Caligula. Lot of 20, including some Roman colonials also with countermarks. Only fair condition, but a rare lot of ancient counterfeits with Roman legion marks. . . . . \$50.00-100.00+
- 131. Early Medieval Afghanistan Silver Coin Countermarked by the White Huns, ca. 590 .** Sassanian (Persian) dirham silver coin of Hormizd IV (579-590), Year 1, Balk Mint. Has two rare countermarks of the Hephthalites (White Huns) of Afghanistan. Obverse countermark is head left in headdress. Reverse countermark is the symbol of the Alchon tribe of Hephthalites. . . . . \$100.00-125.00+
- 132. Byzantine Empire Countermark, ca. 620 .** The Byzantine General Belisarius invaded Sicily in 535 AD, and when Heraclius (610-641 AD) became emperor seventy-five years later, he found that most of the bronze coins in circulation there had been introduced by Belisarius' troops, and were in need of validation. Different types of countermarks were used for different weight coins. This 30 mm heavy follis of the Emperor Justinian I (527-565 AD) was countermarked with a pair of hinged stamps. The reverse stamp was carefully positioned to obliterate the original mintmark. It is a 15 mm circular depression with the initials "SCLS" (for Sicily). Exactly opposite on the other side of the coin is a crowned, facing bust of the Emperor Heraclius with a short beard beside his monogram. The countermarking probably was done in the towns of Syracuse or Catania. BMC-370 DO-241, Seaby-882. Original coin VG-Fine, countermark VF. Beautiful, dark sea-green patina. . . . . \$50.00-100.00+
- 133. Eight Reales Piece of Cut Money, ca. 1650.** Cutting coins was common in the 17th to early nineteenth centuries in the West Indies and frontier America as a way to make small change. One well known example is the P.B cut-and-countermarked quarter segments made during the early 19th century in New Orleans by the Planters Bank. This is a circa 1590-1650 eight reales of Philip III or Philip IV, which has been cut in half. What remains is the upper part of the crowned Spanish shield / Lower part of the Arms of Spain. Contemporary accounts note cutting often was done with an axe, but this piece was ineptly made. The maker cut it four more times, but three strikes did not go through, and a small additional segment has been clipped from this slightly bent silver piece's edge. Coin probably F-VF before cutting. . . . . \$75.00-150.00+
- 134. Book: "World Countermarks on Medieval and Modern Coins", 1976.** By Gregory Brunk, 401 pages, yellow cloth with dust cover, in original shrink wrap. Reprints 55 articles from The Numismatist and American Journal of Numismatics, including Frank Duffield's classic "Trial List Countermarked Coins of the World" (1919-1921) and Howland Wood's "Coinage of the West Indies with Especial Reference to the Cut and Countermarked Pieces" (1914). \$35.00-45.00+

## US Merchant Countermarked Coins

### Important Whitcombe Brockage Cent

- 135. Countermarked Rare Brockage Large Cent! 1849.** The date of this coin can be seen in mirror image on the reverse as 184- with the last digit overstruck by the countermark so it might be "1849" or "1848". The large cent is slightly broad struck because of the multiple strikes. The reverse had at least two solid coin die incuse stampings with a shift of about 5 degrees between them, which resulted in offset stars. It finally was stamped at an extreme angle by the edge of another coin, which did not eject. This resulted in a depressed area of reeding at the coin's edge and also flattened part of the obverse date. The coin then circulated for some time before being stamped on both the obverse and reverse by "H. Whitcombe". This piece was called "H. Whitcomb" by others, and was listed as Brunk W-476, "H. Whitcomb" before it could be examined, and the "e" at the end of the merchant's name recognized. Rare Large Cent brockage, probably the only brockage countermarked! ..... \$1500.00-2000.00+

Early American Hallmark of Joseph Anthony's Sons.** No hallmark directory offers an exact match to this mark, but it is quite similar to many of the known hallmarks used by Joseph Anthony. It only differs in having a period between the two initials, rather than a middle dot. Anthony & Sons was a Philadelphia partnership from 1810 to 1814. RARE. Only known specimen. Bold XF c/m on clean VG 1803 Large Cent. .... \$150.00-175.00+

- 140. PA Philadelphia: William Ashmead Circular Stamp.** Early American Token: William Ashmead was a Philadelphia silversmith from 1797 until the late 1810s. These "Ashmead" and "Phila" stamps are on obverse and reverse of a 1806 Large Cent. On the obverse the stamps are XF and very clear, on AG cent with clear date. The reverse stamps are more in a circular pattern, somewhat over stamped and more difficult to read. UNIQUE with both stamps, one other specimen known on an 1818 cent with 'Ashmead' only. Rare! See Rulau page 60. .... \$200.00-250.00+

- 141. (CT: Preston) William Avery.** "Wm. Avery" on silver two reales. Attributed by Rulau (p.279) to Preston, CT. The period after "Wm" is at the top, not the normal bottom, which may make attribution a bit easier. Struck twice on almost slick coin, top c/m partially weak, bottom c/m bold, but last two letters weak, about F/XF on AG coin. Appears that the two reales has been overstruck by another coin or token die, but it is difficult to tell. Only example on two reales. One of only 5 known. .... \$125.00-200.00+

- 145. (CT: Hartford): Roswell Bartholomew - Early American Token!** From 1804 Roswell Bartholomew was a silversmith partner of James Ward, who also countermarked coins. The 1806 Hartford American Mercury listed them as a military store that sold 'Infantry, Cavalry & Matross Swords, guns, cartouch boxes, pistols, caps, holsters & valises; epaulettes & Sergeant's knots, sashes, feathers, laces & cards, Cockades, priming wires & brushes; French & bugle horns, trumpets, drums & fifes; standards, etc...' In 1814 the firm became Ward, Bartholmew and Brainard, keeping that name until the 1830 death of Brainard. From 1830 to 1840 Bartholomew was a silversmith who also sold real estate, iron and copper goods. "RB" in serrated oval hallmark. An odd stamp, which might have been meant for military items. ## Unique Silver Hard Times Token

- 149. (NY:Lyons and Newark): UNIQUE Silver Hard Times Token, GUNSMITH MARKS.** This double countermarked piece has never been sold at auction, and it is illustrated and discussed in both Rulau and Brunk. The first stamp is "A. Henshaw" Bar Punch by a gunsmith and engraver of Newark, NY, who lived close to the other gunsmith who stamped this coin. In fact, the marks appear to have been applied at the same time! Orra Bennett made percussion halflock guns in Lyons, NY, and applied the incuse marks "O. Bennett" and "Lyons" above and below "A. Henshaw". The Bennett mark is UNIQUE, and the only other example of a Henshaw mark also is stamped "1837", which dates these pieces. Very strong and bold XF marks on 1789 Two Reales, clear and strong Good, small hole at edge. A once in a lifetime chance to bid on a UNIQUE Gunsmith Hard Times Token, apparently stamped by two friends! .... \$2500.00-2550.00+

150. (FL Treasure Island): **Bil-Mar, 1939.** Hank Thoele recently solved the puzzle of this enigmatic countermark, which previously was identified to Treasure Island in the San Francisco Bay, and then to the Treasure Island Amusement Park in Scarborough Mere, Yorkshire, England. Treasure Island is a small community in Florida that is located west of St. Petersburg on an island connected to the mainland by the Treasure Island Causeway. One of its hotels is the Bilmar Beach Resort. So this is a Florida countermark that may have been used fifty years ago as the latest known date is 1948. Perhaps a FL researcher can discover the reason for its issue! "Bil-Mar/Treasure Island", strong and bold XF c/m on English Penny of 1918, VG. Less than a dozen known. . . . . \$75.00-85.00+

151. (IA): **G. Bitzer.** This interesting mark also is found on an 1867 Cedar Rapids, IA bridge token that is in the style of a Civil War token. Since Bitzer is a Scandinavian name, and the c/m also is known on a Norwegian two ore, the Bitzer c/ms are listed in some Scandinavia references. Until recently its connection to Iowa was uncertain, but a search of Civil War induction records indicates that two people named "G. Bitzer" enlisted in Muscatine County; one apparently stamped this coin years later. "G. Bitzer" on 1882 Jamaican farthing. One of only 3 known, all on different coins and tokens. Unique. \$100.00-125.00+

152. (MA Springfield) **J.A. Bolen, Medalist and Diesinker.** The famous Bolen worked from 1858 to 1874 in Springfield. This restrike was made by a Boston coin dealer in the 1950s or 1960s using two original stamps to 'tease' Maurice Gould, the well known writer on countermarked coins. "J.A. Bolen", 12 mm on obv. "J.A. Bolen", 9 mm. on rev. Two distinct stamps, about Fine/XF on VF 1847 Large Cent. . . . . \$50.00-60.00+

157. (CT New Cannan): **Unusual CIRCULAR BAND A.M. Bouton on Early Half Cent.** According to Rulau, Alexander Malachi Bouton of New Cannan was born in 1807 and was a tool maker. This is an exceeding unusual c/m coin which has been stamped three times. Around the reverse rim is an unusual, serrated circular band mark "A. M. Bouton Warranted" of the sort that appears on such things as nineteenth century saw blades. "Cast Steel" is stamped twice in the center, overlapping and at right angles to each other. Sharp bold XF on Early Half Cent, perhaps 1797, AG. Unique! \$225.00-250.00+

159. (NY New York City): **Boyd.** This is a well known countermark, but its origins have been a mystery. Recently Michael McAllister noticed that the letter style of "Boyd" is identical to the typeface used by "Boyd's Directories" in its publications and advertisements. William H. Boyd of New York City was well known from the middle to late nineteenth century for publishing city and state directories. "Boyd" VF c/m on 1876 Seated Quarter, VG. . . . . \$75.00-85.00+

164. **"H.S. Burges".** While Rulau suggested Burges was a silver plater in Baltimore, MD, Frank Thoele reports that many Burgeses lived in Maine in the 1850s and 1860s. The top "B" is missing on most of his c/m coins because his stamp broke. "H.S. Burges" F/VF c/m on G/VG 1838 Large Cent, pitted. . . . . \$50.00-60.00+

167. IA Dubuque: **Charles Cannon, Grocer. RARE IOWA Mark.** Until recently the only information that could be located about Cannon was a couple of city directory listings, which noted Charles and Henry Cannon sold groceries at 41 Main from 1857 to 1860. Then Josiah Conzett's 'Recollections of People and Events of Dubuque Iowa, 1846-1890' was put on the internet by a genealogist. 'Next to the (American) hotel, Geo. Starr had a grocery store. Here my brother Jacob worked the winter of 1847/48. Next to that the Cannon Bros, Bill, Chas. and Henry, also had a grocery store.' One of the few Iowa countermarks, and struck before the Civil War when Dubuque was a major Mississippi River town. "C. Cannon/Grocer/No.41/Dubuque, Iowa." Bold VF at top, with only first 3 letters of last line clear, on Good+ 1854 arrow & rays Seated Half Dollar. Only half a dozen known, only 3 on half dollars. RARE. . . . . \$400.00-450.00+

169. (TX Houston?): **G.W. Capron.** Rulau notes that many example of this c/m appear on New Orleans Mint coins, and suggests they were issued by a Southerner. Hank Thoele searched the relevant Census records, and discovered that a person of this name was listed in the 1860 Census in Houston(while another was listed in Attleborough, MA). Two types of marks are known, one with a backwards "N". This has the usual "N" in the name. "G. W. Capron", rectangular bar punch, VF, on AG 1853 arrows & rays Seated Quarter. \$100.00-125.00+

203. **NV Unionville: Empire Gold & Silver Mining Co.** Maurice Gould, who was the leading authority on merchant countermarks in the 1950s and 1960s, thought the example in his collection was from Virginia City. But a stock certificate of the company, which is reproduced in both Brunk and Rulau, shows an incorporation date of July 24, 1863, in Unionville, Humboldt County, N.T. (Nevada Territory). Given the size of the c/ms, it seems likely that they were intended for stamping ingots. ONLY KNOWN SPECIMEN of this Curved Bar Punch variety. 4 total. See extensive discussions in Rulau and Brunk. ### Cincinnati Faris Photographer

207. **(OH) Cincinnati: J.W. Faris, Photographer.** See long write-up in Brunk about Faris photographers of Cincinnati. An 1844 advertisement noted Faris's Colored Photographic Miniatures with a gallery at 150 Main St. So this might be a Hard Times Token, although it more likely was issued a little later. "Faris"/"Cincinnati" in two separate marks, both XF, first "C" of 'Cincinnati' partially off the bust of the French King Louis XVIII on which it is stamped. One of the few American c/ms on a French coin. 1819-A French Five Francs, VG, holed at edge. Only two examples known for this photographer, and both varieties are UNIQUE! . . . . . \$600.00-650.00+

210. **Ford Automobile Co.** For decades coins have been found stamped with the trademark of the Ford Automobile Co. While we do not know the original purpose of these coins, the 1958 'Numismatist' reported that 'The tale of the Ford Company offering a new car in return for certain specified coins is an old one that crops up periodically...' Hank Thoele has noted that the Ford marks are of two sorts. Those with a broken flourish to the 'F' in 'Ford' were struck c 1963, and five years after the 'Numismatist' report. It has been speculated that someone took a broken Ford stamp from a trash bind, and used it to stamp coins sold to collectors at car shows, but the precise origins of this variety are uncertain. There is a relatively large number of these broken "F" coins, mostly on the silver half dollars that were common in circulation in the early 1960s. In contrast, the various stamps that do not have a broken 'F' are 'originals'. They often are in thick script, are deeply struck, and are worth more. This is an 'original' Script "Ford", bold XF, on obv. and rev. of Good 1904 Indian Cent. . . . \$50.00-60.00+

221. **(NH Exeter): Goodwin's Patent Medicines.** The 'G.G.G.' and 'G.G.G.G.' countermarks have been collected for 150 years, but only a few years after being struck their origins had been forgotten! In this vein, lot 1457 of the April 28, 1863, W. Elliot Woodward auction noted, 'Goodwin's Grand Grease Juice for the Hair, G.G.G., struck over a U.S. cent, very curious.' David Bowers discovered that G.G.G. was 'The Great American Preparation for the Establishment, Growth and Beauty of the Human Hair'. The initials 'G.G.G.G.' refer to a 'breath perfume' called 'Goodwin's Grand Glittering Globules'. While M.H. Goodwin registered these products and their trademark initials, they were sold by one of his relatives, Charles H. Goodwin of Exeter. "Use/G.G.G." bold XF mark on choice brown VF/XF 1853 Large cent. 229. **"In God We Trust" Political-Religious Mark on Seated Silver Dollar!** This countermark seems to have been associated with the political campaign by religious activists to add the motto "In God We Trust" to US coins. Beginning in 1866 that motto appears on a banner above the eagle in the same place that it is found on this coin. 'God' is from a distinctly different style of individual letter punches than the rest of the motto in having ornate flourishes. Bold VF on rev of 1860-O Silver Dollar. 234. **"G.W.C" on Half Cent.** At least three merchants used these initials to stamp coins, and the issuer has not yet been identified. The obvious candidates are G.W. Collins, a photographer in Urbana, Ohio; George W. Chapin, an arms inspector who specialized in swords, and G.W. Capron of Houston, Texas. Over fifty examples are known. Most pieces are stamped a number of times, and seem to have been issued c 1861. "G.W.C" struck three times, VF-XF on obv. of dark VF/XF 1833 Half Cent. . . . . \$75.00-100.00+
235. **(NY Earlville): G. W. 245. "Hunt & Moore" (KY Saloon?). This enigmatic mark has given Rulau a great deal of problems, and has been shifted repeatedly in his 'Standard Catalog'. It seems to be a saloon token since a struck token is known that reads 'Hunt and Moore Proprietors, Good for 1 Drink'. It may be related to Moore, Hunt Co., sole agents for the Bourbon and Rye Whiskey manufactured by Jesse Moore & Co. of Louisville, KY. Bold VF+ mark on beat up 1803 Large Cent. \$100.00-125.00+

He probably is the person listed as 'G.W. King' in reference books on photography, and was a daguerreian in Norwich, NY in 1847. Most of King's marks are so small that they are difficult to read, but this stamp is large enough to see that the correct reading is "C. W. King". 264. (PA Philadelphia): William Levis Bar Punch Hard Times Token. William Levis also spelled his last name 'Lewis' in some of his stamps. He was born in 1785. As a silversmith he was mentioned infrequently in Philadelphia city directories. Rulau suggests he lived in Chester county, and had a son of the same name, which would explain why half a dozen different stamps are attributed to Levis. In any event, from the dates of his coins it appears that they were issued c 1836, and this is a HTT. "W. Levis" in rectangular bar punch, raised letters, very bold XF mark, on AG 1836 Bust Dime. \$150.00-175.00+

277. (PA: Philadelphia): **J. H. Metz Hotel.** "J.H. Metz's/Hotel/N.E. Cor Jeffn Av. & Fed. St". This stamp was an enigma until both Hank Thoele and Michael McAllister independently realized that 'Jefferson' refers to Jefferson Square, which borders Federal Street, near Moyamesnsing Ave. in Philadelphia. In the 1860 Census John J. Metz was listed as a thirty-five year old inn keeper. A person named John Metz enlisted in Company A of the 68th Pennsylvania Regiment that was raised in Philadelphia, was wounded at Gettysburg, and died of his wounds. Only four pieces known, three on 1858 or 1859 small cents, and one on an 1800 two reales. So this either is a CIVIL WAR TOKEN, or was issued just before the outbreak of hostilities. First & last lines deliberately curved to fit on a small cent. Bold XF mark on VG Flying Eagle Cent. **RARE.** .... \$400.00–450.00+

278. (MA: Millbury): **Asa Waters Early American Token.** Asa Waters was born in 1769, the son of a gunsmith of the same name. He began contracting with the US government in 1818, and his countermarks are from the stamps used to mark his guns. The latest coin is 1824, and some of his c/ms include the dates 1825 or 1831, which indicates that the entire series is from the Early American period. "Millbury" as appears on his guns. Bold XF mark on Fine 1822 Large Cent. .... \$150.00–175.00+
279. **"Miller House".** The location of this hotel, which stamped coins c. 1877, should be identifiable by searching business directories. 280. (NY: NYC): **W.B. Moffatt, Physician.** Swoger suggests these are by W.B. Moffatt, a New York physician in the 1840s and 1850s. "Moffatt" struck twice each side, mark too large for coin, so does not fit; on AG/slick one real, holed. .... \$150.00–200.00+

## Munson Hard Times Token

283. (CT: Yalesville?): **"O.H. Munson" Hard Times Token on 1805 Quarter.** A comparison of this mark to the touchmarks of a Yalesville, CT, pewterer named J. Munson indicates that their letter style is quite similar. So the two smiths were likely relatives. Rulau lists this as a Hard Times Token (HT-551, page 136). "O. H. 295. (IL: Ottawa?): "The Ottawa". The very odd thing about this mark is that it incorporates "The" as part of the stamp. This is the only countermark in Brunk's listing of about 20,000 countermarked coin that does so! An extensive search of the internet suggests that the only sort of business that would have been likely to advertise itself as "The Ottawa" was a theater. That being the case, Ottawa, IL, and Ottawa, Canada are the obvious locations, but the historical records on theaters are so spotty that a firm identification has not yet been made. 298. (MA: Springfield): Paine: Two ARMS Marks on Silver Real. Along with one of Paine's advertisements, this important coin is the back cover of the first edition of the Brunk book! From 1846 to 1848 Richard Paine worked for Ames Mfg. Co. as a Navy contractor and arms inspector. He also made mechanical perpetual calendar medals and steel embossing dies for corner cards, which were popular in the 1850s. The 1845 Springfield directory listed him as a 'Stamp Cutter, Die Sinker and Inspector of Arms'. "J.O.G." in serrated rectangle is mark of another arms inspector, whose name is unknown, but also is found on two large cents. Given their similar occupations, and the way the two stamps appear on this coin, it seems likely that Paine and J.O.G. were friends, and stamped this coin at the same time. "By R. 334. **"Sage's/Candy/Coin" on Half Dollar**. Since many patent medicines were marketed as "candies", it was believed that Sage's Candy was a patent medicine sold by R. V. Pierce of Buffalo, NY, who used the trade name "Dr. Sage" (see Brunk, first edition. for one of his advertisements). David Bowers suggests, instead, that these "Candy Coins" were given away as prizes like those found today in boxes of Cracker Jacks. That hypothesis is supported by the fact that all examples of "Sage's/Candy/Coin" on genuine coins are on 1874 US silver, which dates their issue to that year. An area ripe for research! 340. (LA: New Orleans): **CONFEDERATE CIVIL WAR DIME from the SIEGE OF NEW ORLEANS.** J. B. Schiller was an importer of alcohol and proprietor of the Sazerac Coffee House at 13 Exchange Place. During the Union siege of New Orleans he issued paper notes for 25 and 50 cents. He also made dime SIEGE TOKENS by stamping 1860 US small cents with his name and a large "X" over the "One" so the reverse becomes "X Cent" indicating ten cents. This siege piece has been called 'one of the most important American tokens', and an examination of published photographs indicates the Brunk specimen may be the finest known. "J. B. From the 1890s to 1963, the Nathan Snellenberg Department Store was in business on Market Street. 351. **Sprague & Blodgett's Georgia Minstrels Admission Half Dollar.** This was a traveling show that employed all the important minstrel singers of the day. Apparently it was only in business for a short time in 1876. "Sprague & Blodgett's/Admit/One/Georgia Minstrels" with first line curved. This uncommon sort of countermarked coin indicates that the price of admission to the show was fifty cents. An advance man for the Minstrels would arrive a few days before the troupe, and put some of these countermarked half dollars in circulation as advertising. They would be accepted by the Minstrels when people came to the show, only to discover that the price of admission was fifty cents, and having such a half dollar gave them no discount! The famous Black American Charles Hicks was the advance man! He owned and managed a number of minstrel shows composed of African-American. Earlier Hicks was the star of Sam Hague's Slave Troupe of Georgia Minstrels and toured Germany. Upon his return he managed two troupes that quickly went bankrupt, and became the advance man for Sprague and Blodgett's in 1876. By 1877 he created Hick's Georgia Minstrels, so it is likely this was only used in 1876! Choice, bold XF mark on nice VG 1873 arrows Seated Liberty Half Dollar. 440. **Counterfeit British Gold Coin Intended for the West Indies Trade, 1783.** One reason so many coins were countermarked in the West Indies was that a very high proportion of them were counterfeit. This is a reeded edge, contemporary counterfeit 1783 George III guinea (KM-604) with elaborate shield. It was deliberately struck with the inscriptions slightly cut off the rim to simulate a clipped coin. On the center of the bust is what appears to be a badly struck countermark, and a partial version using only the edge of the same stamp is below the first. Despite extensive inspection, we cannot determine what the stamp imitates, if, indeed, it was meant to imitate anything at all. Held one way it looks like the letter "M" over a partially struck letter "T", but the strike is so bad that the stamp cannot be identified. 24 mm, gilt brass. Slightly bent, a couple of test scratches, gilt worn on high spots. About VF/XF for wear. . . . . \$100.00-150.00+

## First Issue of Ecuador - 1831

441. **First Issue of Ecuador: MDQ Monogram on Eight Reales, 1831.** This countermark was listed by Medina in 1919 (227-228), but for many years no one knew who had issued it. Then a decree was found that established such countermarked Colombian coins were the first issues of the nation of Ecuador. The countermark consists of the incuse, script monogram "M D Q" meaning "Moneda de Quito." This example is stamped on a silver 1820-JF Cundinamarca (Colombia) eight reales. The coin is AG. The counterstamp is VF, but as with the more common, 1821 piece illustrated in KM, the top part of the stamp broke so that the monogram's loop is incomplete. We have traced only one example of "M D Q" on an 1820 Cundinamarca eight reales. KM does not value it, simply calling it "Rare." ..... \$750.00-1000.00+

446. **(England): Bradford Workhouse.** In 1813 the Bradford Workhouse, which is what Americans would call a 'poor house', was destroyed by a fire. So too were the dies for making its tokens. Two stamps then were cut to counterstamp tokens already in circulation in that part of England. A century later the stamps were obtained by Samuel H. Hamer, an avid collector, who co-authored the standard reference on late eighteenth century British tokens. Circa 1910 Hamer used the original stamps to countermark other sorts of coins and tokens. So both originals and restrikes exist. This is an original, "Bradford" and "Workhouse" in two semi-circular stamps, bold XF on F/VF 1812 British Union Copper Co. Penny Token. .... \$50.00-60.00+

Because he didn't pay the tax, he was able to sell the paper cheaper than his competition, and soon it began to include news stories as well. Lloyd countermarked so many coins to advertise his paper, that Parliament passed the 'Act to Prevent the Defacing of the Current Coin of the Realm' in 1853. This did not apply to non-English coins, which lead to the importation and marking of millions of Continental bronze coins. See extensive write-up in Brunk. "Read.Lloyds.Penny. France entered the Franco-Prussian War of 1870-1871 with the expectation of a quick victory, only to be shocked by the defeat of the French Army lead by the Emperor Napoleon III at the Battle of Sedan on Sept. 4, 1870. He surrendered to the Prussians, who soon defeated another French army at Metz, and then besieged Paris. These anti-Napoleon III political coins were made in the area of northeastern France that was occupied by the Germans, particularly the city of Strasbourg, where they were sold as souvenirs for a moderate premium over face value. 497. (Java): **Sumenep's 'Madura Star.'** Apparently an issue of the port of Sumenep on the island of Madura, off the northeast coast of Java. In the auction of Fred Pridmore's collection, it was noted that he purchased an 1813 Java Rupee with such a countermark in Singapore in 1951. The countermark often is attributed to Paku Nata Ningrat (1812-1854), but the status of this particular piece is uncertain. The countermark consists of three crossing lines in a shield-shaped oval indentation on a 1766 Java rupee (KM-175). Such coins were issued in 0.833 silver, and this one looked "bad enough" that it was scratched numerous times to see if it was plated. The countermark (KM-191.3) is VF. \$75.00-100.00+

This is only the second piece traced. If anyone should have been an expert on these it was Hans Schulman, whose cousin ran the famous auction house in Amsterdam, and was killed by the Nazis in the Second World War. Coin F-VF. Countermark strong VF, probably made from three separate letter punches in the way that "IRA" and "UDF" countermarks were stamped on Irish coins in Ulster. Rare. \$100.00-200.00+

## Miniature Coins

515. **Rare Miniature Twenty Cents, ca. 1878.** Stars around seated liberty, "Counter" below / "Imitation L. Chr. Lauer Twenty Cents" around Eagle. Nice copy of twenty cent piece. Rare type as virtually all other miniatures are of European coins, and this was not in the extensive Fuld collection purchased by Brunk. By the mid-nineteenth century, enough advancements had been made that it had become possible to mint highly detailed medals. So a number of European die sinking firms started making exceedingly small, miniature medals to advertise their services. They soon discovered that making miniature coins was even better as people could compare them with real coins then in circulation to see the quality of the work. Such miniature coins became popular as souvenirs, and were minted by private European mints for the next century. Individual pieces can be dated by the type of coin that they imitate. Dark VF. \$50.00-60.00+

## Important and Rare Jefferson Shell Peace Medal

### Lewis and Clark Awarded Jefferson Indian Peace Medal

- 576. Historic and Important Jefferson SILVER Shell Indian Peace Medal, 1801.** Thomas Jefferson Indian Peace Medal, a Silver Shell. Julian IP-4, Belden 17, Prucha 39b, 39.56gm, 55mm wide. With original top loop (found separately and replaced), excavated on private property some years ago and new to the market. Probably one of the medals presented by Lewis and Clark on their expedition.

The Jefferson silver medals have long been widely collected and appreciated as the finest work of the new US Mint in the Indian Peace medal series. They were fashioned by striking thin silver medals from dies made by John Reich, then paired together with a German-silver band or collar around the rim. Joseph Richardson Jr., Mint assayer and silversmith would have done the work to produce these important medals for presentation to Indian Chiefs, at the time of treaty signing and by Lewis and Clark as important gifts to symbolize the peaceful intentions of the expedition. Lewis and Clark carried three of the large Jefferson medals, 13 of the middle, and either 15 or 16 of this, the smallest sized Jefferson medal (accounts are not fully clear), as well as 55 of the Washington Seasons peace medals. Interestingly, Gunselman and Sprague, in an account of the discovery of one of these Jefferson medals in an Indian grave in 1964, account for the dispersal of each sized medal by the expedition, by date. They also report there were minor differences in the outer edge of the Jefferson medals, and in the type of top loop.. Traditionally the Jefferson Peace medals as silver shells have been explained by the report that the Mint did not have presses large enough to stamp them as solid medals at that time. The silver shells were placed back to back with a German silver band holding the two halves, with the attachment of a pillar and ring at the top.

Little known by most numismatists is the variation in the attachment of the pillar, fob and ring. The type of top loop and alignment of the loop are inconsistent on known examples, indicating hand finishing, repairs or different lots. This example, when excavated, was found nearby the pillar and ring, and were reunited by the finder with glue. Many of the known examples of these medals are found missing the pillar and have been punched with a hole, for a ring or cord. There are three basic tops, a pillar and ring such as on this example, and heavy and light top rings, attached either parallel to or at a right angle to the medal. Sprague reports "...a strong relationship, not necessarily one to one, between medals with the square pillar and the medals carried by Lewis and Clark", and further "Those medals, for which there is strong evidence for a genuine American Indian context, show a strong

tendency to be of the heavy, square pillar type". That, and the reported location of this find, indicate strongly this is one of the Lewis and Clark examples, an important historical find. At this late date it is not possible to point to a specific Indian who got this, unfortunately!

And, while Julian reports that the late Byron Johnson stated at least one of the Jefferson shell medals was excavated with a wooden core, none are currently known with any material inside the silver shells. This example has the well machined pillar, however as noted above, the original alignment may have been different. Julian pictures the two smaller sized medals without any loop or pillar. Belden pictures the large size medal with a similar shaped pillar to this, but slightly larger. Prucha pictures the 105 and 55mm sizes with a simple loop. The ANS specimen of the 103mm example (1923.52.11) shows a similar pillar and loop to this example, while the ANS 54.5mm example has only a simple loop.

One of the most important of all Indian Peace medals, the Jefferson is the first struck medal in the Mint series, and is in the rare shell format. Probably awarded to an Indian by Lewis and Clark in their expedition. Under Jefferson, the United States grew by its largest purchase, and these medals played an important part as gifts to Indians in the new territory. They were highly prized by the recipients, handed down through generations, or buried with the owners. Peace medals were a badge of honor to the Indians, and a sign to all that the wearer was a friend to the Americans.

This medal was excavated on private property many years ago and was cleaned and brushed, and is now toning nicely to a rich, golden tan. Very choice and excellent Extremely Fine with just some minor wear. A small rim ding obverse above "T" in "The", and two trivial rim dings reverse at the right hand, and at "I" will serve to identify this example to future researchers. Some minor scratches to the right of Jefferson's head. With some very mild surface dents, as are very usual to these thin shell medals. The joined edges of the rim meet 3mm to the left of the center of the pillar. This has been authenticated by Numismatic Guaranty Corporation, the only recommended authenticator of Indian Peace medals (1844151-001). . . . . \$40,000.00-45,000.00+

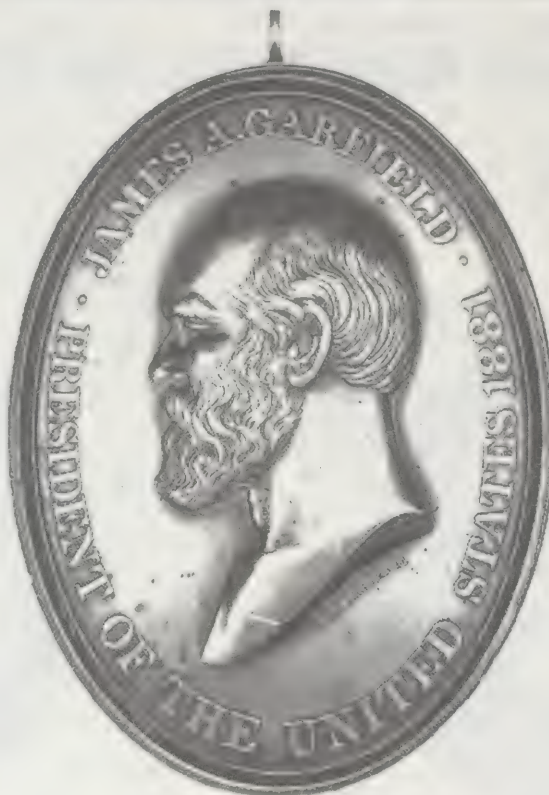

Gunselman and Sprague also list all then-known examples of all three sizes of the Jefferson medal in collections, with just three examples of this 55mm size with the same pillar:

Nex Perce National Historical Park  
American Museum of Natural History  
Oklahoma Historical Society.

Other ca. 55mm medals are reported, but not with the pillar and ring.

## Rare SILVER Indian Peace Medals

- 577. SILVER John Adams Indian Peace Medal, 1797.** By Moritz Furst. None were specifically struck for Indians in any metal. However, Belden states at least one "...shows evidence of wear, and was probably given to some Indian". Apparently all were struck after 1846, as the reverse die was made then. Struck with Type I reverse, probably struck late 19th century. Silver, 51.05mm, 2.8mm thick, original top hole for suspension, 69.12gr, 10.47 specific gravity (RVC). Lightly toned VF/XF, some light scratches in fields, minor damage above bust. Original matte finish, polished. . . . . \$5000.00-7500.00+  
None in Garrett, Dreyfuss or Schenkel. Ex-World Exonumia 1999 sale, lot 1051.

- 578. IP-44 James A. Garfield Oval Silver Indian Peace Medal, 1881.** By Charles Barber and George Morgan. Very rare silver oval Indian Peace Medal. One of four similar silver oval IP medals in this sale, all from the World Exonumia 1991 sale, where they first appeared on the numismatic market. Obverse bust left, legend around "James A. Garfield President of the United States 1881". Reverse scene of a farmer showing an Indian Chief the benefits of civilization, with wreath encircling a crossed peace pipe and tomahawk. The Arthur medal in Beldon has a similar top loop, although it appears to be somewhat smaller than the loops on these medals. Noted authority John J. Ford Jr. examined these silver medals in 1991 and suggested they were struck on cast planchets. It was common practice to cast planchets when small quantities were needed, rather than going through the lengthy process of rolling ingots out into strips. These oval IP medals show signs of double striking, with all having pronounced high wire rims. Wire rims are rarely if ever seen on silver medals for presentation to Indians, as the rim would quickly be damaged. Consequently these were undoubtedly struck for a collector. It is quite interesting to note that no other similar pieces have shown up in the past century.

four are struck from the new reverse die without the date "1877", which was made in 1879. The similar fabric of these four pieces does create a mystery! While these ovals appear to be struck about the same time, Ford suggested they were probably struck around 1890-95. SILVER, 59.4x75.6mm oval, 6.5 to 7.4 thick, 195.80gr, 10.38 specific gravity (RVC). Heavy loop soldered on top perpendicular. Belden 59. Choice XF, lightly toned, very slight wear on high points, matte fields. Almost complete wire edge obverse and reverse, high and pronounced obv 3/4. All the these ovals have a faint, thin "S" in the field between the chimney and settler's head. . . . . \$5000.00-10000.00+  
ex-Dr. William C. Bridge of Elgin, IL, ex-World Exonumia 1991 auction, ex-Private Collection. Specific gravities done by Dr. F. Duane Ingram, of Rock Valley College (RVC).

- 579. IP-45 Chester A. Arthur Oval Silver Indian Peace Medal, 1881.** By C.E. Barber. Legend around bust right "Chester A. Arthur President of the United States 1881", same reverse die as Garfield, thin "S". Large top loop attached perpendicular to top of medal. Belden 60. Choice XF, lightly toned, slight cabinet rub on high points. Almost complete high wire edge. Traces of obverse die rust, some micro-holes as if struck from a cast planchet. Silver, 59.5x76mm oval, 6.9mm thick, 196.60gr, 10.41 specific gravity . . . . . \$5000.00-10000.00+  
ex-Bridges, ex-WE 1991 sale, ex-Private Collection. Extremely rare, probably unique! Only one known original silver, sold in Dreyfuss for \$16,000. Ford stated "Cast Planchet" for this specimen.

- 580. IP-46 Grover Cleveland Oval Silver Indian Peace Medal, 1885.**  
By Charles Barber and George Morgan. Similar to the previous medal, with legend around bust right "Grover Cleveland President U.S.A. 1885", the same reverse die, with thin "S". Almost complete wire rim, pronounced obverse-left, complete on reverse. Silver, 59.4x75.5mm oval, 6.3 to 7.5mm thick, 193.98gr, 10.39 specific gravity (RVC), top hole. Belden 61. Choice Extremely Fine, lightly toned. . . . . \$5000.00-10000.00+  
ex-Bridges, ex-WE 1991 sale, ex-Private Collection. Extremely rare, probably unique! Ford stated "Probably on rolled planchet."

- 581. IP-47 Benjamin Harrison Oval Silver Indian Peace Medal, 1889.**  
By Charles Barber and George Morgan. Similar to previous legend around bust left "Benjamin Harrison President U.S.A. 1889", same reverse with "S". Almost complete wire rim, pronounced obverse right, reverse top. Light reverse die rust, heavy silver oxide. With heavy top loop perpendicular to medal, smallest loop of the four medals. Silver, 59.4x75.5mm oval, 5.7 to 6.6mm thick, 193.75gr, 10.40 specific gravity (RVC). Belden 62. Choice Extremely Fine, lightly toned. . . . . \$5000.00-10000.00+  
ex-Bridges, ex-WE 1991 sale, ex-Private Collection. Extremely rare, probably unique! Julian states none of the Harrison pieces was issued in silver or bronze to Indians, all were made and sold to collectors. Ford stated "Rolled planchet".

Bronze medal, 38 mm, 95 mm total length. In 1901 the miners of Telluride, Colorado walked out, calling for a set daily wage, and for union representation. Mine owners refused and hired non-union men to reopen the mines. Some 250 armed strikers confronted the scab miners and after killing three, forced the rest to leave town. The owners were forced to agree to a \$3 minimum daily wage. This fair settlement did not bring peace to the mines, for in 1903 there was a general strike of the mill and smelting workers and miners. In Colorado City the Western Federation of Miners called a strike demanding wage increases and the eight-hour day. A strike of miners in Cripple Creek involved 3500 miners from 50 mines. The mine owners brought in outside miners and appealed for martial law. On 4 Sept. 1903 Governor Peabody ordered Brig. Gen Sherman Bell to proceed to Cripple Creek with the militia to maintain peace and order. On 6 June 1904 (10 months later), an explosion at the Findley Mine railroad station killed 13 non-union miners. The mine owners were quick to blame the union, precipitating lynching, censorship and destruction of the local newspaper. Mobs stormed the union hall and the militia arrested union men and sympathizers. By the 10th over 200 men were forcefully deported from the Cripple Creek district. Soon the mines started up again (with non-union miners) and the militia left 16 July. Choice AU. .... \$325.00-350.00+

It was available for 25 cents in coin, plus a Shaeffer's box top, and the offers for it do exist on surviving recordings. The show aired Saturday mornings, briefly, and was a 'continuing story of mystery and suspense set in faraway lands. The example I'm looking at consists of nine parts... 1154. MA Albert Pike, Confederate Brigadier General, High-Ranking KKK Official and Southern Masonic Leader Portrait Medal, 1891. While little remembered today -- because so many Americans consciously tried to forget his legacy -- Albert Pike was one of the most colorful and notorious figures in US history. Born in Massachusetts, he was a Western explorer who traveled to Sante Fe in 1831, later moved to Arkansas, and worked there as a lawyer defending Native American rights. He recruited a company of cavalry to fight in the Mexican-American war, and was present at the Battle of Buena Vista. When the Civil War began he was made a Brigadier General in the Confederate Army and commanded troops from a number of tribes living in Indian Territory (now Oklahoma). At the battle of Pea Ridge his men deserted, scalped and defiled the bodies of Union soldiers. He also was charged with theft of Confederate funds, and his arrest ordered, but he resigned his commission and fled into the hills of Arkansas to avoid trial. After the war he became a high official in the Ku Klux Klan, and was charged with treason by the US government. Pike created the KKK rituals for Nathan Bedford Forest when he was Grand Commander of the Southern Jurisdiction of Scottish Rite Masons and writing 'Morals and Dogma', which for sixty years was given to all new Masons of the Southern Jurisdiction. Pike was a follower of the Jewish mystical tradition called kabala, which recently has been advocated by Madonna and other Hollywood celebrities. He moved to Washington DC, and carried on an affair with a nineteen year old girl when he was almost sixty. When a statue was erected in Pike's honor in 1901 at Third and D Streets in Washington, the speakers at the dedication extolled his work as a Mason, and one noted that "the name of Albert Pike will grow bright as the ages roll by," but otherwise ignored his increasingly stained reputation. In the 1890s he had been a hero to the Masons and the Daughters of the Confederacy, but after all his misdeeds became public, he was reviled by both, and the Masons conducted a formal hearing into his association with the Klan. Pike eventually became known as a 'libertine, traitor, glutton, incompetent and murderer,' and his memory did not 'grow bright'. Instead, he became the prime example that anti-Masons cited when claiming that Masons were morally evil and the Craft should be suppressed. During the 1990s Pike once again became a controversial figure as his statue because a source of friction among Blacks, Jews, and other groups, with some politicians demanding that it be torn down. - 1442. NY Fairmont: Chautauqua: Important French Universal Exposition Award Medal, 1900.** The Chautauqua Program for education and entertainment was established at Fair Point on Chautauqua Lake, New York, in 1874. It evolved into an annual Chautauqua, and its summer lectures and classes were supplemented by home readings and correspondence study. In 1883, William Harper, later President of the University of Chicago, became its director. Many famous Americans were guest lecturers, and William Jennings Bryan (four time US Presidential nominee) went to Fair Point year after year to deliver his famous "Cross of Gold" speech. By 1900 there were over 400 local branches of Chautauqua, and in 1924 the traveling Chautauquas visited 10,000 communities and over 40,000,000 Americans attended their lectures, concerts, plays, and other events! With the popularity of movies and the advent of the automobile, the movement almost disappeared by the mid-1930s, although the original New York establishment and many "Chautauqua Parks" in towns around the country still exist. - 1922. Rare Gateshead Perambulation Medal, 1824.** It was a tradition in a few English parishes to periodically walk the boundary line, which was called a perambulation. A few, VERY RARE medals were struck for such occasions, and were given to those who participated in the ceremony. The "Monthly Chronicle of North County Lore and Legend" noted the following about this perambulation. "On Ascension day, May 27th, 1824, the Revd. John Collinson, with his churchwardens, and twenty four parishioners perambulated the ancient borough of Gabrosentium as Gateshead was called by the Romans. This was the first perambulation since 1792, and a general holiday was declared, and a great number of townspeople accompanied the procession. They were attended by two constables, with flags and two pipers. The procession assembled at St. Mary's church, and at 9 a.m. proceeded to the 'Blue Stone' on Tyne Bridge, where, from a ladder over the side of the bridge some descended, and plodged through the mud by the river to follow the northern boundary. The main procession headed by the pipers playing the 'Keel Row' proceeded along the northern and western boundaries to Wrekenton, where refreshments were provided. Afterwards they joined the ladies and danced to the music of an excellent band. The procession then moved along the southern and eastern boundaries to the river Tyne, at the north west corner of a strip of land called the 'Friars Goose', where the constables and pipers took a boat and returned to their starting point at the Blue Stone on the bridge. The perambulation ended at 4:30 p.m. and the party sat down to dinner at the Black Bull inn, Sir R. S. Hawks, Knight, being in the chair." **1937. Thomason's Medallic Bible Quotation Medals, 1835.** Group of six medals with Biblical quotes on each side issued by Sir Edward Thomason (1769-1849), a Birmingham eccentric and medalist, who invented the English cork screw. He issued a number of series of medals, including a 60 piece medallic Bible, and medals celebrating the Elgin Marbles, which were taken from Athens' Parthenon to the British Museum in the early nineteenth century. Many of his medals have artistic obverses, and multi-line, almost endless reverse inscriptions. Of equal interest are the old tags that describe five of the pieces in this lot. Collectors of a century ago kept their medals in elaborate wooden cabinets that had velvet-lined circular depressions cut into their drawers. With each of this lot's medals was placed a 23 mm circle of heavy white paper on which the collector described the piece. On these paper circles are various comments, and "Batty" numbers, which refer to the monumental "Batty's Catalogue of the Copper Coinage of Great Britain, Ireland, British Isles and Colonies, Local and Private Tokens, Jetons, etc." published in Manchester between 1868 and 1898. It was the first general catalog of British tokens, but very hard to use as the tokens were not listed in any particular order, but randomly as Batty came upon newly discovered items. - 1954. "To Hanover" Counter, 1849.** "To Hanover" game counters are satirical imitations of gold sovereigns of Queen Victoria. Almost all are dated "1837" on the reverse, but this one is unusual in being dated "1849" on the obverse, apparently the year it actually was issued. When William IV died in 1837, Victoria succeeded him as Queen of England, but women were not allowed to rule the German state of Hanover, which also was a possession of William IV. So Ernest Augustus, Duke of Cumberland and son of George III, became King of Hanover. These counters have a bust of Victoria, and the reverse satirizes their Saint George killing the dragon motif with Ernest Augustus wearing a crown and holding a sword, while his horse prances on a multi-headed dragon, "To Hanover" above. If one did not look close, this would be accepted as a sovereign since it does appear to be gold. It began over a dispute concerning the Christian holy places in Jerusalem, which were then part of the Ottoman Empire. After the Russians destroyed the Turkish Black Sea fleet, the French and British ordered the Russians to withdraw, which they refused to do. Eventually the British, French, Austrians, Turks, and others allied against the Russians. The British-French victory at Balaklava was immortalized in 'Charge of the Light Brigade' by Tennyson. ## English Spade Guineas

- 2019. Unusual S&T Imitation Spade Guinea, ca. 1800.** The spade guinea is a gold coin of King George III, so-called because its crown over pointed shield looks like a garden spade. It was minted from 1787 to 1799, when the sovereign became the standard British gold coin. In later years, the old spade guineas and half spade guineas were copied extensively and used as advertisement tokens, card counters, commemorative medals, and as parts of badges when holed for suspension. Most are anonymous, but a small portion had their legends changed to indicate their issuer or their purpose. R. N. P. Hawkins published an important series of articles on them in the 'British Numismatic Journal' from 1960 to 1968, and there has been increased collector interest in the series recently because of the publication of two books: David Magnay's 'A Catalogue of Advertising Imitation Spade Guineas and Half Guineas' (1997) and Bryce Nelson's 'One Thousand Guineas' (2004). Most of the series beginning with King Pharamond (417 AD) are from the drawings of Thomas Bernard (1650-1713), who had to "invent" portraits of the early rulers as none are known. The early medals are unsigned, and who executed them is uncertain, but it often is said that the bulk of the series was engraved by Jean Dasser (1676-1763) during his stay in Paris. ## Famous People

- 2504. General Cornwallis Medal, whose defeat at Yorktown ended British Attack.** Charles Cornwallis (1738-1805) commanded the British Army that surrendered to Washington at Yorktown in 1781. Besides that minor setback, he had a long and distinguish career. Cornwallis went on to serve as Governor-General of India, where he defeated the Tipoo Sultan of Mysore, was created a marquess, and returned in triumph to Britain in 1794. In 1797 Cornwallis was appointed Viceroy of Ireland, where he defeated the French invasion of 1798 and crushed the Irish Rebellion. He treated the Irish with leniency, and when George III refused to grant Catholic emancipation in 1801, Cornwallis resigned, and again became Governor-General of India, where he died in 1805. "Charles Marquis Cornwallis" around 3/4th facing bust in military uniform and revolutionary-era hat / "Ab Ori Ente ad Occasum" above angel, blowing trumpet, holding laurel wreath, and walking triumphantly between flags, cannon, and cannonballs at her feet. ## George Washington

- 2516. Unique Corrected Frederickburgh Lodge / George Washington Portrait Medal!** By Lovett! "George Washington" around Washington's bust right / "Initd. in Frederickburgh Lodge MD, Nov 4 1752" around compass, Masonic square and "G". Signed by Lovett ("G.H.L.") on obverse. According to the Rulau and Fuld's revision of Baker, Lovett struck ten medals before he realized that he had wrongly engraved the die "MD" as Frederickburgh is in Virginia! So his efforts were wasted, and he destroyed the reverse die, which explains why the medal is rare, and Rulau and Fuld value it at \$100 in copper. But Rulau and Fuld then go on to write that a single example exists in brass "with a partially corrected state name attempting to correct MD to VA. This may have been done by the engraver, but we doubt it." This copper medal also has been corrected by changing "MA" to "V" by removing the "A" and the vertical portions of the "M". The change was so skillfully done that we did not notice the correction until reading Rulau and Fuld's comments. The existence of this previously unknown copper medal suggests that the change was, indeed, done by Lovett. 28 mm, only known example in copper and a UNIQUE piece. Nicely toned Red/Brown AU. . . . \$200.00-250.00+
- 2517. George Washington Temperance Medal, ca. 1840.** "George Washington United States of America" around bust of Washington left / "To the Cause of Temperance Ten Dollars, To King Alcohol Not a Cent" Unlisted. Not in Rulau. Not in Baker. 24 mm, gilt brass, crudely holed for suspension, otherwise Very Fine. Early, possibly Hard Times era. . . . \$35.00-50.00+
- 2518. Edward Everett Campaign Medal, 1860.** Everett was one of the most prominent post-Civil War American politicians. He began his career as a senator from MA, was Minister to Great Britain, President of Harvard, Secretary of State, and Vice-Presidential Candidate on the 1860 Constitutional-Union Ticket. "Edward Everett Born April 11, 1794" around bust left / "George Washington Born April 11, 1794" around bust right. Baker-213B. Collins-178. By Jos. H. Merriam. 31 mm, white metal. Bright AU, minor rim nicks. . . \$150.00-200.00+
- 2519. Washington's Tomb and Statue Medal by Lovett, 1860.** Unlisted mule of two G. H. Lovett reverses. See Rulau-Fuld revision of Baker, page 109 for the dies: "Washington's Tomb Mt. - 2521. "In Memory of the Centenary" George Washington Medal, 1876.** "George Washington 1876" around odd bust left / "In Memory of the Centenary" around odd rendition of eagle perched on American shield. Baker-497, Collins-323, and Rulau/ Fuld, were all mystified about this piece. The mystery is solved by comparing it to the Spade Guinea Imitations in the Brunk collection, some of which are the same stylè, and like this piece are holed for suspension to be worn at celebrations. So this piece was made in England, and is similar to "In Memory of the Good Old Days" spade guinea imitations (see lots 2036-7). Rarity seven. Gilt brass. R-F state that the edge is plain, but this edge is milled. 25 mm, probably uncirculated, but like many spade guinea imitations the piece is weakly struck. .... \$75.00-85.00+

- 2524. Signed "M" for George T. Morgan, designer of the Morgan silver dollar. Holed and suspended by a red, white and blue ribbon from a brass hanger with six stars and Washington's bust in a small medallion. Meant for the festivities. Rulau and Fuld's revision of Baker's book on Washington Medals, page 209, simply notes that this medal with the Denver reverse is "Rare". 37 mm white metal. Lightly toned XF+ \$100.00-125.00+
- 2525. Order of United American Mechanics Washington Medal.** "Gen. George Washington, First Pres. U.S. 1789" around bust right / "Honesty, Industry and Sobriety" around "O. U. A. M." compass and Masonic square around arm holding hammer. Copper, rarity six, and not illustrated in Rulau and Fuld's revision of Baker (B-336A). Copper, 25 mm. Toned Red/brown XF/AU. .... \$85.00-100.00+
- 2526. Unlisted George Washington "Silver Dollar" Gaming Token.** This unusual piece is the size of a US silver dollar with a reeded rim and dentilated border. The obverse and reverse seem to be identical, with each consisting of a circle of stars around a dentilated circle within which is "George Washington, Born 22. Feby 1732 Died 14. Dec. 1799" around an unusual bust of Washington. But when examined closely, the bust, is centered slightly differently on the obverse and on the reverse. So this was made using a master punch of Washington's bust. Not illustrated in the Rulau-Fuld revision of Baker, nor was it in the Garret or Ford auctions, various lists of US pattern coins and mint medals, etc. Unsigned. 37 mm, silvered brass, reeded edge. One side strongly struck, the other side slightly double struck so that the edge dentilations are not clearly defined. Lightly toned XF/AU with areas of light brown and black toning on one side. .... \$75.00-100.00+
- 2527. Washington Cent Restrike.** "George Washington Born Virginia Feb 11, 1732" around Washington's bust in military uniform left. Reverse is blank. See Red Book page 60. - 2584. Very Important Rough Riders Badge for the Spanish-American War! 1898.** While Teddy Roosevelt today is associated with the

Rough Riders, the idea for the enlistment of Western cowboys as "rough riders" in the US Cavalry actually originated with Jay L. Torrey. He managed a large cattle and cavalry horse ranch in Wyoming in the 1890s, and was the Republican Speaker of the House of the Wyoming State Legislature. At the beginning of the Spanish-American War he proposed that Western cowboys be recruited into special cavalry regiments, which he called "Rough Riders," and his proposal was accepted by the War Department. Torrey then was commissioned colonel of the 2nd Regiment of US Volunteer Cavalry, which recruited cowboys from the Western states. They were trained in Fort Russel, Wyoming, but Torrey and his men never reached Cuba. The train that was carrying Torrey's Rough Riders to Jacksonville, Florida, derailed in Tupelo, Mississippi, killing several of them, and severely injuring Torrey. Two years later, after recuperating, Torrey was considered as Republican Vice Presidential candidate on the William McKinley ticket. Ironically, the Rough Riders are now associated with Theodore Roosevelt, who was chosen as Vice President and became President when McKinley was assassinated. That is because by the time Torrey's Rough Riders reached Florida from Wyoming most of the fighting in the Spanish-American War had ended. So the regiment was mustered out

without ever seeing combat. This important badge was issued for Torrey's Rough Riders during their stay at "Camp Cuba Libre" in Jacksonville, Florida, from June 28 to late October of 1898. Bronze hanger "Souvenir" from which is suspended a yellow ribbon with gold letters "Torrey's Rough Riders, Camp Cuba Libre, Jacksonville, Fla, 1898" from which is suspended a bimetal medal in the shape of a Maltese cross. ## POLITICAL

### Party Tickets

Until the turn of the century all American ballots were printed by political parties, rather than the government, which is why they look "strange." They were made to be distinctive because until the Australian ballot reforms were adopted, voting was not a secret act in the US, and party hacks checked on everyone to make sure they voted for the "right party" by putting their "tickets" in an open and public ballot box. These ballots come from the age of "fusion politics," which is why some of them have multiple party names. In a couple of cases you can see that candidate names were changed at the last minute by inking in a new name, as the coalition of parties changes. All these ballots are rare, and each may well be unique. We have only seen a couple of examples in the last fifty years! During the late 1970s Brunk was traveling the back roads of Massachusetts and found this small group of party ballots in a barn! Someone had accumulated them a century before, and in some cases had written in pencil the likely year or the place where the ballot had been used.
